

MEGA DRY

INNOVATIVE TRIMMING

1,000 POUNDS PER HOUR

Massive production for large scale smokable hemp producers. Get your hemp processed quickly and cost effectively.

LOW IMPACT SYSTEM

Vacuum free design means 100% of trim is captured and ready for extraction.

FARM READY CONFIGURATIONS

Optional super sack or conveyor trim capture systems are ready to work the way you work.

FULLY AUTOMATIC

Automatic loading and quality control conveyors make commercial scale production easy.

GMP READY

100% Food grade components and GMP ready design are ready for any facility.

PURE TRIM

Lubricant free cutting system provides a close, pure trim with hand trim quality results.

PROFFESIONAL GRADE

The Triminor® MEGA Dry is the faster dry trimmer in the world. It's specifically built for commercial volume capable of trimming up to 50 acres a day with boutique trim results.

The MEGA DRY meets the demands of commercial-scale smokable hemp farms by offering fast and streamlined production. The fully automated infeed and adjustable quality control conveyor reduce labor and provide shelf ready results. The innovative Pure Trim™ shear band creates more uptime and longer trim sessions between cleanings, while multiple configurations make it perfect for every farm and facility.
