

HYBRID™ CONVEYORS

INFEEED

The Infeed Conveyor minimizes gaps that occur with manual feeding and helps maintain a consistent feedstock of material into your trimmer. The Infeed Conveyor also reduces quality control issues by creating a visual inspection of material before it goes into the trimmer.

OUTFEED

Create a continuous quality control inspection by using the Outfeed Conveyor connected to the Hybrid™ Trimmer. Positioning the conveyor and quality control staff on the outfeed of the trimmer ensures that the trimmed flowers can be inspected immediately, reducing errors, lowering costs, and streamlining your harvesting process.

EFFICIENT PRODUCT HANDLING

REDUCED DOWNTIME

The Hybrid™ Conveyors streamline your cannabis processing operations while minimizing labor expenses and requirements. The conveyors also feature tool-free disassembly in just one minute to keep your trimming operations going while maintaining a clean workflow.

SANITARY CONSTRUCTION

Constructed with 304 Stainless Steel and fully-encased anti-microbial polyurethane, the conveyors are ready for use in any GMP-Certified facility. The food-safe materials are ideal for cannabis processing and handling.

OPTIMIZED WORKFLOW

Turn your trimming job into an automated processing workflow with Hybrid™ Infeed and Outfeed Conveyors. Boost trimming efficiency and product quality with consistent product fed to the trimmer and continuous visual inspection of your product.

SEAMLESS PROCESSING

Adjust the settings of your conveyors to create the ultimate trimming solution for your facility. Variable speed, forward, and reverse options make the Hybrid™ Conveyors an effective accessory for any trim room.

SPECIFICATIONS

	INFEEED	OUTFEED
HEIGHT	39 IN / 99 CM	36 IN / 91 CM
WIDTH	19 IN / 48 CM	21 IN / 53 CM
LENGTH	61 IN / 155 CM	63 IN / 160 CM
MOTOR POWER	1/10 HP	1/10 HP
POWER REQ	120 V, 1.5 A	120 V, 1.5 A
SPEED RANGE	6 – 35 FT / MIN	6 – 35 FT / MIN
